

Bermuda Electric Light Company Limited Environmental Policy

Bermuda Electric Light Company (BELCO) is committed to maintaining a high standard of environmental responsibility through the implementation and certification of its Environmental Management System (EMS) to the ISO 14001 Standard.

The environmental principles that guide BELCO include:

Comply with the Law

- Complying with all applicable environmental regulations and other applicable environmental requirements.

Improve Continually

- Establishing and implementing objectives and targets and monitoring environmental performance;
- Promoting environmental awareness of employees and persons working on behalf of BELCO through training and instruction; and
- Routinely evaluating BELCO's EMS to identify opportunities for improvement.

Prevent Pollution

- Implementing, where feasible, cost-effective measures to prevent pollution of air, water and soil and minimizing the impact of accidental or unavoidable pollution; and
- Maintaining emergency preparedness and response procedures in order to effectively manage environmental emergencies.
